DETAILED ACTION

1. Election/Restriction

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method of identifying a compound for treating OA, classified in class 435, subclass 7.1.
- II. Claims 7-13, drawn to a method of identifying an individual with OA using nucleic acid to a kinase, classified in class 435, subclass 6.
- III. Claims 14-19, drawn to a method of identifying an individual with OA using kinase polypeptide, classified in class 435, subclass 7.2.
- IV. Claims 20-27, drawn to a method of identifying an individual with OA using kinase ligand nucleic acid, classified in class 435, subclass 6.
- V. Claims 28-38, drawn to a method of identifying an individual with OA using kinase ligand polypeptide, classified in class 435, subclass 7.2.
- B. The inventions are distinct, each from each other because of the following reasons:

Inventions I-V are independent and distinct, because they are products which possess characteristic differences in structure and function and each has an independent utility that is distinct for each invention which cannot be exchanged. PKR and PKR analogs would have separate sequences and require a separate search of the art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Furthermore, in order to be fully responsive, in addition to electing a Group, Applicants must further elect, where applicable, a tyrosine kinase selected from TYRO3, Axl and cMer. Applicants must further elect either PROS1 or GAS6 as the TYRO3 ligand.

Art Unit: 1647

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).

Advisory information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Landsman whose telephone number is (571) 272-0888. The examiner can normally be reached on M-Th 10 AM - 7 PM (eastern).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Nickol at 571-272-0835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
